

Financial Security is Redefined with SD-WAN

A Case Study on How a Credit Union Strengthened Its Network and Saved 40% with Mejeticks

The challenge

Facing an evolving financial landscape, a **leading credit union** sought **Mejeticks' expertise** for a network overhaul. Amidst service expansion, they grappled with escalating security risks and prohibitive costs of outdated solutions, including their current **MPLS network**. While MPLS has been a reliable technology, its high deployment and maintenance costs, coupled with a lack of agility, prompted the need for change. Mejeticks, attuned to the industry's scale and challenges, was chosen to deploy a bespoke **SD-WAN solution**, enhancing security, efficiency, and ensuring the credit union's enduring commitment to excellence.

The approach & solution

Mejeticks' engagement with the credit union was underpinned by a professional ethos and a commitment to leveraging their network. This enabled Mejeticks to:

- Conduct a thorough market analysis to identify vendors that align with the credit union's **compliance** requirements and desired **security features**
- Evaluate the credit union's numerous sites to ensure the **SD-WAN solution** would provide seamless integration and optimal performance across all locations
- Find a vendor who meets the credit union's **cost** constraints and offers a solution that does not compromise on quality or **functionality**

The outcome

The credit union's strategic partnership with Mejeticks yielded remarkable results:

- A substantial **40% savings** compared to their previous MPLS solution
- Strengthened security posture with advanced SD-WAN security features, providing protection against cyber threats
- With greater visibility and control over their network traffic, the credit union could make proactive decisions for optimized resource allocation and **network management**
- Significant enhancements in network reliability and performance, ensuring **uninterrupted member services**

Getting Mejeticks involved really turned things around for us. They were spot-on in finding a network solution that fit our compliance needs and budget. It was reassuring to have them with us, ensuring we were on the right track every step of the way. Their guidance led to a solid ROI that we could actually see and measure.

- Chief Technology Officer of Leading Credit Union

Mejeticks is an IT Advisory and Consulting firm with over 20 years of experience helping Enterprise Customers with Network, Voice, Cloud, and Data Center vendor selection.
